

PAZ PLACES

All these are always already there.

Wonder light, the cloud's monster or fake false ceilings...

And a pause and the visible spectrum are the only necessary tools to collect those places of calm and serenity, which are such mainly in time.

There is an underlying structure in the beauty of each element and each composition. Systems conforming a whole. Constellations creating a frame from where we can observe at a time every single part and the virtual strings that unite them and set up their dialogue.

Paz Places is a set of collective memories about situations of filled or swollen chest. It lives by the odd possibility of balance between the extremely specific and peculiar states, and the ones aseptically washed of all customizable detail.

A handwritten signature in black ink, consisting of a large, stylized 'D' followed by a series of loops and a small 'r' at the end.

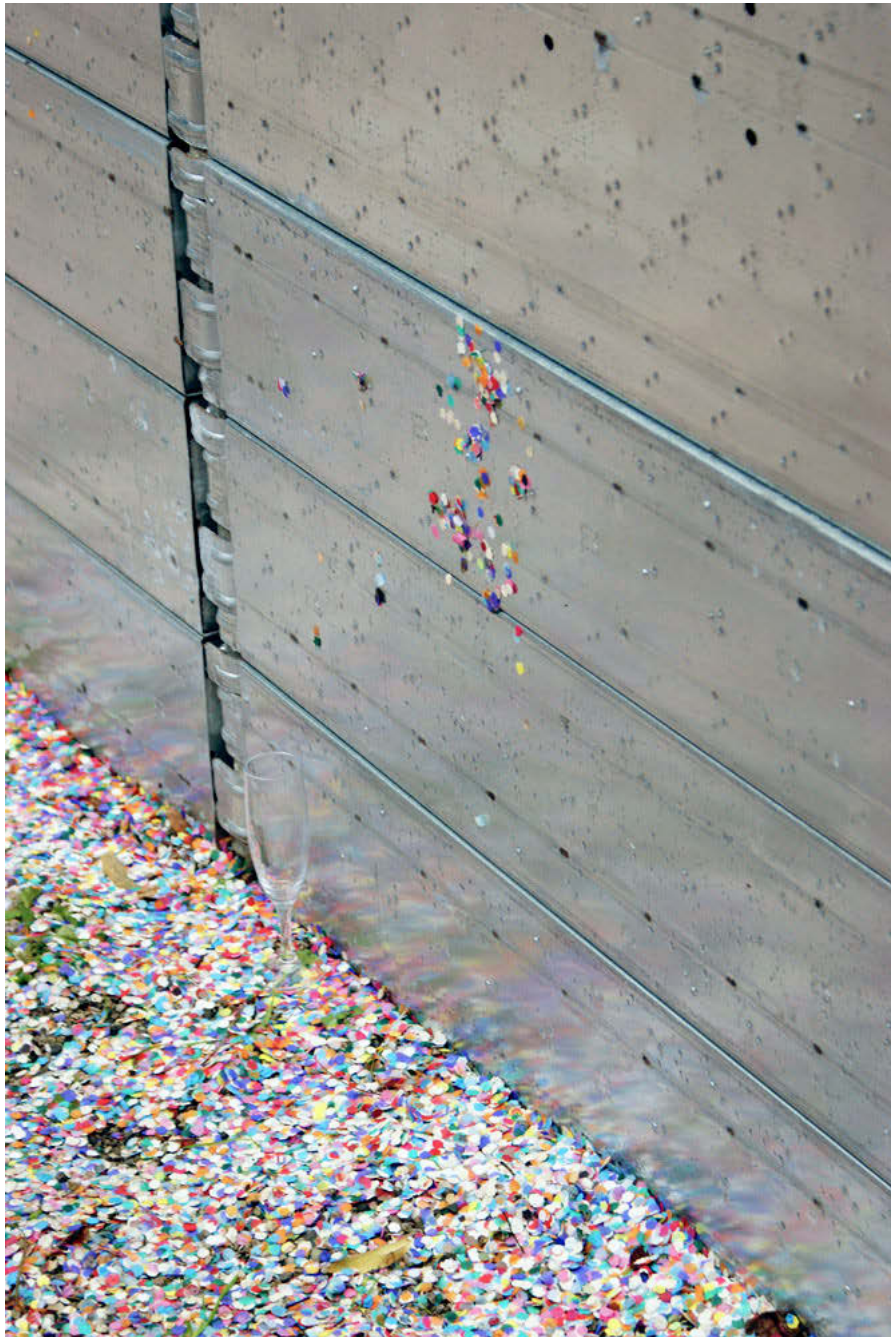

David Díez

The Cornerstone

2010

RC print on aluminum plate
75 x 50 cm
